

## **Product Data Sheet**

Date of Issue: 26 Nov 2019

## 1. Product Information

- Product Name : NpFlamma® MMP-13 ICG
- Catalog Number : PNM0301
- Packing Unit : 10 tests / 50 tests / 100 tests
- Appearance : Green Liquid
- Storage Conditions : Protect from Light at 4 °C

## 2. Additional Information

- Fluorophore Label : ICG
- Excitation <sub>Max</sub> : 798 nm
- Emission <sub>Max</sub>: 835 nm

## 3. Description

NpFlamma® MMP-13 ICG is a NIR dye-incorporated MMP-activatable chitosan nanoparticle (CNP) that enables to selectively detect tumor cells. The probe comprises ICG dye that connected to a quencher through a MMP-13 cleavable peptide, and the peptide is chemically conjugated to CNP. ICG dye is clinically approved fluorescent NIR dye and used in medical diagnostics, in vitro/vivo and animal model study. The maxima of Ex/Em values are at 798/835 nm. BioActs offers NpFlamma® MMP-13 ICG as a smart fluorescent probe for monitoring MMP-related diseases such as cancer progression, invasion and metastasis, rheumatoid arthritis, pulmonary diseases and areas of cardiovascular disease, and also for evaluating the potential therapeutic efficacy of drugs targeting for these diseases.

WARNING: Intended for research use only. This product is not intended or approved for human, diagnostics, therapeutic or veterinary use. Use of this product for human or animal testing is extremely hazardous and may result in disease, severe injury, or death. MATERIAL SAFETY DATA: Review the complete Material Safety Data Sheet before use Material Safety Data Sheet (MSDS), Certificate of Analysis (COA) and Technical Information are available at http://www.bioacts.com or upon request.
