

Product Data Sheet

Date of Issue: 26 Nov 2019

1. Product Information

• Product Name : BSA, Flamma® 560

· Catalog Number : RSC0106

· Packing Unit: 5 mg

· Appearance : Red Solid

· Storage Conditions: Protect from Light at -20 °C

2. Additional Information

• Fluorophore Label : Flamma® 560

· Reactive Group: BSA

• Excitation Max: 560 nm

• Emission _{Max}: 589 nm

3. Description

BSA, Flamma® 560 is a fluorescence conjugated bovine serum albumin (BSA). Flamma® Fluor dyes display strong absorption, high fluorescence quantum yield, and high photostability, and they maintain good fluorescence activity and stability after conjugated to biomolecules. The maxima of Ex/Em values are at 560/589 nm. Fluorescent BSA conjugates have been used in many applications such as quantitative studies of electroporation, measurement of plasma volume, intracellular protein processing. BioActs offers BSA, Flamma® 560 as a bright and photostable fluorescent tracer in various applications that require tracers having well-defined physical dimensions.
